

I would like to take this opportunity to formally introduce **air cool engineering (NI) Ltd** as an official Business Solutions Partner (BSP) of the Mitsubishi Electric, Partner Programme.

At Mitsubishi Electric, we are committed to delivering the highest quality air conditioning, heating and ventilation products. Our Partner Programme, which was established in 2005, was created to ensure that our partners offered the same level of commitment to *their* customers. Today the programme has 629 active members across the UK, able to offer a five year warranty on Mitsubishi Electric air conditioning equipment.

With over 20 years of industry experience, Martin Mullan of **air cool engineering (NI) Ltd** and his team (based in Limavady), have met the key qualification criteria to become a BSP, demonstrating that they have the specialist expertise and company philosophy to match Mitsubishi Electric's high standards and values. We are confident that **air cool engineering (NI) Ltd** is a viable and successful company and quality-driven organisation, that will enhance the Mitsubishi Electric brand throughout Northern Ireland.

Energy use in our homes and across all business sectors including retail, hospitality, health and education, has been scrutinised over the years. It is important when you buy a world class brand, you receive the same performance from the company designing, installing and maintaining our systems, as you would from Mitsubishi Electric.

We are delighted to work in partnership with Martin and his team, to bring to you and ultimately your clients, the largest range of innovative and energy efficient products for the built environment. To find out more about **air cool engineering (NI) Ltd**, telephone +44 (0) 28 777 67114, email [sales@ni.aircool.co.uk](mailto:sales@ni.aircool.co.uk) or click onto their website [www.aircoolengineering.co.uk](http://www.aircoolengineering.co.uk).

Yours faithfully,

Kelly Austin  
Partner Programme Manager
