

Cool Transformation For Former Bakery

The North West's latest restaurant and bar has opened its doors after months transforming its premises from a bakery, to a contemporary and chic new dining experience.

Limavady based business **air cool engineering (NI) Ltd**, won the tender to install air conditioning, heating and ventilation at The Classic Winebar on Main Street, Limavady. The restaurant's impressive 5000 sq ft dining space was completely gutted back to its 'shell'. An initial system design provided by DMAC Engineering Design, was subsequently adapted and modified by **air cool engineering**, to suit The Classic Winebar's dynamic and evolving interior design.

The restaurant had three Mitsubishi Electric ceiling cassettes and two ducted units fitted in the main ground-floor dining and bar areas. These systems work in conjunction with two Mitsubishi Electric Lossnay Heat Recovery units - providing heating, cooling and ventilation services to the entire space. To co-ordinate with the decor, cassettes and linear grilles were painted to minimise their visual impact.

Andrew Grant, Project Manager for **air cool engineering (NI) Ltd** said: "Air Cool Engineering specialises in the design, installation and maintenance of air conditioning, heating and ventilation systems. With over 20 years of industry experience, we have built strong relationships with numerous national brands, as well as independent restaurants, bars, health suites, hotels and surgeries. We were delighted to win the tender to install The Classic Winebar's HVAC system - highlighting that businesses needn't look far to find the expertise required for this type of project."

air cool engineering (NI) Ltd is a Mitsubishi Electric Business Solutions Partner. The primary focus is ensuring the delivery of the highest possible standards in both equipment supply and skilled workmanship we provide. We are committed to demonstrating competence in key areas such as installation, commissioning, maintenance, Health & Safety and Corporate Social Responsibility.
